## SENIOR PROJECT ENGINEER

Accomplished senior project manager and project engineer with extensive experience managing technology projects. Hands on experience managing cost, schedule and reporting through the earned value reporting. Proven team leader and team builder.

## SUMMARY OF QUALIFICATIONS

- Analytical thinker who understands cost, schedule and earned value reporting system with in depth experience coordinating cost and schedule tracking across multiple programs.
- Extensive experience identifying, tracking, and closing open issues across multiple project elements within a program unit.
- Skilled communicator across diverse engineering disciplines, and with client and regulatory bodies.
- Proven team leader and dedicated team member.
- MS Office, Project software proficiency

## EDUCATION, CERTIFICATIONS, CLEARANCES

- Northwestern University M.B.A. Finance.
- New York University M.E. Nuclear Engineering.
- Temple University B.A. Mathematics.
- PMP Certification, Project Management Institute as Project Management Professional.
- Member of American Nuclear Society.
- Inactive DOE Q clearance.

## SKILLS & ACCOMPLISHMENTS

### Coordination of Cost and Schedules

- For the program manager, developed facility wide integrated program schedule and individual project schedules across multiple projects.
- Complied, tracked, managed, and reported project and program status through the earned value reporting system.
- Managed the project baseline and design change control.

### Design Change Control

- Managed final design configuration with the goal of identification and elimination of design mismatches across engineering and safety disciplines.
- Designed and implemented design change-control process involving tracking, documentation, and communication of design changes.
- Reviewed work packages for compliance with engineering principals, company standards, and contract requirements.
- Organized and cross checked final project design deliverables.

## Project Controls

- Developed and managed the work scopes and work breakdown structures.
- Defined work package deliverables.
- Developed project schedules, resources, and budgets.
- Provided program status to project controllers.
- Tracked project execution and schedule variance through the earned value system.
- Managed project execution, work packages, and projects documentation.

## Communication and Deliverables

- Organized, assembled, and cross-checked final project design deliverables.
- Drafted final design reports, progress reports, and power point presentations.
- Prepared status briefings for program manager.
- In depth experience with technical writing.

## Team Leader

- Developed and mentored independent project teams that bonded, worked together, executed, and got the job done.
- Developed and supervised configuration management team of final design engineers.
- Supervised project teams in the execution of the project schedule.

## EMPLOYMENT HISTORY

2007-Present **Project Area Project Engineer**, Suncor Energy, Alberta Canada

2005-Present **Senior Project Engineer, Time Solutions Corporation, Albuquerque, NM**

2002-2005 **Design Manager, Configuration Manager, Planning and Integration Manager**, GD Barri, Inc., Denver CO.

2001-2002 **Project Engineer**, Los Alamos National Laboratories, CMR Facility.

1995-2001 **Lead Project Engineer**, Rocky Flats Environmental Test Site, Golden CO

1991-1995 **Management Analyst**, A.T. Kearney, Atlanta GA

1991-1994 **Principal**, RCG Hagler Bailly, Inc., Boulder, CO

1984-1991 **Finance Manager**, Capital Associates, Inc., Boulder, CO

1982-1984 **Financial Analyst**, Allied Signal/Universal Oil Products, Chicago, IL

1972-1982 **Senior Resident Nuclear Reactor Inspector**, U.S. Nuclear Regulatory Commission  
Bethesda, MD
